

A BLAST FROM THE PAST

Mesabi® Radiator is the superhero of radiators! The cover and photo below is from the February 1991 Encores featuring a haul-truck which rolled off the road and was damaged, leaving the Mesabi® radiator bent into an 'S' shape – still working and not leaking. Mesabi® products are built to last the life of the equipment and beyond.

L&M AND L&M WORD SEARCH

Not all superheroes are as famous as RadMan! Below is a list of some from the distant past. See if you can find them all!

EXTRA! EXTRA! L&M Times EXTRA! EXTRA!

An out-of-control locomotive carrying 40 cars loaded with coal left the tracks just outside of Columbus, Ohio screeching towards a congested downtown street. At the same moment a coach bus from Central Ohio Transit Authority (COTA) pulled away from the curb with a bus load of children heading to school and senior citizens being transported to a local pharmacy to receive their second COVID vaccine. As the coach bus entered the next intersection, the locomotive slammed into the rear wheels of the bus causing metal to erupt into hundreds of deadly pieces of shrapnel. Upon impact, the Mesabi® Radiator leapt from the bolt on the frame and shielded the passengers from danger taking blow after blow from the shrapnel. Mesabi® was beaten, twisted and pulled almost completely apart but she never leaked a single drop. Meanwhile,

out of nowhere, RADMAN swooped in and saved the passengers aboard the locomotive from what would have been certain death. In the end, not a single person was injured, and Mesabi® kept performing without hesitation. With a quick salute, RADMAN flew away to rescue other equipment that were sure to be in grave danger.

In other news, a crazed masked menace has been terrorizing local mining towns. In This villain has vowed to continue until our beloved protector, Radman, promises to exhile himself to the place where he was born. Have no fear. Radman is here!

Sorry... none of that is true.

But we do have the damaged Mesabi® Radiator from COTA, pictured here. Mike from COTA said that all he knew was that a car struck the coach at the left rear where the radiator is located – the radiator was still working perfectly and did not leak!

We like our more colorful version better! Mesabi® products hold up under the rough and rugged conditions just as they were designed to, even when the unplanned happens.

This reminds us of a similar story we reported on in the February 1991 and again in April 2008 Encores – a haul truck rolled off the road and was damaged leaving the Mesabi® radiator bent into an 'S' shape – still working and not leaking. Mesabi® products are built to last the life of the equipment and beyond.
